Jsp script to determine how many times the visitor has loaded the page

```jsp
<%@ page import="java.io.*,java.util.*" %>
<html>
<head>
<title>Count visitor</title>
</head>
<body>
<form>
<fieldset style="width:50%; background-color:#e6ffe6;">
<legend>Count visitor</legend>
<%
            Integer hitsCount =
            (Integer)application.getAttribute("hitCounter");
            if( hitsCount ==null || hitsCount == 0 )
            {
               /* First visit */
out.println("Welcome to my website!!");
hitsCount = 1;
            }
            else
            {
               /* return visit */
out.println("Welcome to my website!!");
hitsCount += 1;
            }
application.setAttribute("hitCounter", hitsCount);
        %>
<p>You are visitor number: <%= hitsCount%></p>
</fieldset>
</form>
</body>
</html>
```
